State of Siege Doron Goldenberg 2003 The situation the Matzav as it really is. Television audiences might be forgiven for believing that the nightly news presents the whole picture of the Israeli-Palestinian conflict. The broadcasts are by now familiar. A blown out Israeli bus, charred and smoking. Survivors sitting by the roadside, shocked and bleeding. Israeli tanks rolling into dusty Arab villages. The words "cycle of violence", "terror", and "retaliation". See it all in photographs. But how does it feel to be walking down a street, knowing that at any moment, the next explosion might engulf you and those around you? What is it like to go to work or school on a bus -- in Jerusalem, Tel Aviv or Haifa, hoping it will remain intact for the journey? This is a unique, controversial, and thought-provoking artistic critique of the situation in Israel today, conceived and created by the young Israeli artist, Doron Goldenberg, a graduate of the Bezalel Art Academy in Jerusalem. In this powerful work, through the use of both words and images, Goldenberg captures a sense of the impact of terror that can't be broadcast on television. He has also created a visual tool that conveys a mood -- a sensation -- that can't be communicated via a news-commentator.

Emotion Measurement Herbert L. Meiselman

2021-04-09 Emotion Measurement, Second Edition highlights key elements of emotions that should be considered in the measurement of emotions in both academic and commercial environments. This edition begins with an updated review of basic studies of emotion, including the theory, physiology, and psychology of emotions, as these are the foundational studies which food scientists as well as product developers and marketing professionals need to be aware of. The second section highlights methods for studying emotions, and reviews the different approaches to emotion measurement: questionnaire self-report, behavioral, and physiological. This section explores the merits of intrinsic versus extrinsic measures of emotion. Some new measurement approaches have emerged since the first edition of this book. The book then presents practical applications, with chapters on emotion research in food and beverage, as well as in a range of products and clinical settings. The experience in testing product emotions has increased since the first edition when product emotion research was newer. Finally, Emotion Measurement, Second Edition provides coverage of cross-cultural research on emotions. This is critical because much of the newer commercial research is aimed at markets

around the world, requiring methods that work in many cultures. And the universality of emotions has been a topic of research for decades. Taking both an academic and applied approach, *Emotion Measurement, Second Edition* will be an invaluable reference for those conducting basic academic research on emotions and for sensory and consumer scientists, and the product developers and marketing professionals they work alongside. Reviews both the academic and the applied strands of emotion measurement research Focuses on cross-cultural studies of emotions, which is currently lacking from most of the literature in the field Highlights methods for studying emotions in both basic and applied studies
