Audit of Car Ownership Models Gerard de Jong 2002 RAND Europe has carried out a research project on car ownership modeling, called

ÂAudit of car ownership models, for the Transport Research Centre (AVV) of the Dutch Ministry of Transport, Public Works and Water Management. This report

presents a review of existing models for car ownership. The review contains a description and comparison of existing Dutch car ownership models and a review and comparison of recently developed models in the international literature and models used in practice. The report also includes recommendations on directions for potential development for improving the AVV car ownership models. The background of this audit is the desire of AVV to obtain information on the basis of which a well-founded decision can be made on the development of an improved car ownership model that can produce robust and sensible car ownership forecasts for all kinds of variants of variabilisation of the road tax (MRB) and car purchase tax (BPM). As part of this project, a number of policy advisers were interviewed about what types of outputs are required from a car ownership model, what should be the forecasting horizon and what should be the policy variables to be

simulated.

The History of Cartography, Volume 4 Matthew H. Edney 2020-05-15 Since its launch in 1987, the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment, the highly anticipated fourth volume, offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans, both at home and in overseas territories, from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic

projects became possible under the aegis of powerful states. Yet older mapping practices persisted: Enlightenment cartography encompassed a wide variety of processes for making, circulating, and using maps of different types. The volume's more than four hundred encyclopedic articles explore the era's mapping, covering topics both detailed—such as geodetic surveying, thematic mapping, and map collecting—and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries.

Yes she can Marianne Heiß

2011-05-19 Trotz aller Frauenquoten, Emanzipationsbestrebungen und positiver Beispiele: Der Anteil der Frauen in den Chefetagen liegt nach wie vor nur bei 2,5 Prozent. In den Vorständen der 200 größten

deutschen Unternehmen sind nur 21 Frauen. Und das, obwohl bewiesen ist, dass Frauen ein entscheidender Wirtschaftsfaktor und Erfolgsgarant sind und damit ein dringend notwendiger Bestandteil der Unternehmensführung. Wollen Unternehmen langfristig bestehen, sind sie schlicht auf weibliche Führungskräfte angewiesen. Marianne Heiß, als CFO bei der Agentur BBDO selbst Topmanagerin, zeigt, warum sich Unternehmen selbst ins Ausstellen, wenn sie auf weibliche Mitarbeiter verzichten. So haben sich beispielsweise während der letzten Krise die Herrenriegen in den Führungsetagen nicht mit Ruhm bekleckert. Sie verrät, wie frau es ganz nach oben schafft - und warum Unternehmen wie auch die gesamte Wirtschaft davon profitieren.
