Understanding the Life Course Lorraine Green 2016-12-20
Understanding the Life Course provides a uniquely comprehensive guide to the entire life course from an interdisciplinary perspective. Combining important insights from sociology and psychology, the book presents the concept's theoretical underpinnings in an accessible style, supported by real-life examples. From birth and becoming a parent, to death and grieving for the loss of others, Lorraine Green explores all stages of the life course through key research studies and theories, in conjunction with issues of social inequality and critical examination of lay viewpoints. She highlights the many ways the life course can be interpreted, including themes of linearity and multidirectionality, continuity and discontinuity, and the interplay between nature and nurture. The second edition updates key data and includes additional material on topics such as new technologies, changing markers of transitions to adulthood, active ageing, resilience and neuropsychology. This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing, and will provide thought-provoking insight into the wider

contexts of the life course for students of psychology and sociology.

Adolescence John Santrock 2007-11-29 More students learn from John Santrock's Adolescence than from any other text in this field. Students and instructors rely on the careful balance of accurate, current research and applications to the real lives of adolescents. This new 12th edition features expanded coverage of emerging adulthood, increased coverage of brain development, integrated and expanded coverage of health and wellness, and a new and improved Visual Assets Database for instructors.
Drugs, Crime, and Their Relationships: Theory, Research, Practice, and Policy Glenn D. Walters 2013-02-15 Surveys administered to high school students, studies carried out on jail and prison inmates, and interviews conducted with substance abusers undergoing treatment all point to the same conclusion: drugs and crime are strongly connected. Why they are connected is less well understood, however. Written for middle to upper-level undergraduate courses on drugs and crime or substance abuse and crime, this book examines the drug-crime connection in a systematic and comprehensive way. *Drugs, Crime, and Their Relationships* covers the entire drug-crime spectrum, starting

with a review of drug and crime terminology, classification, theory, and ending with policy implications for prevention, harm reduction, and macro-level management of the drug-crime problem. The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug-crime relationships. As the book proceeds, the boundaries between drugs and crime blur, thus revealing the complex and intimate relationship that links these two behaviors. *Drugs, Crime, and Their Relationships* is divided into four sections. The first section offers an introduction and overview of theories on drugs, crime, and their relationships. The second section explores the relevant research on the biological, psychological, sociological, and static/situational correlates of drug-crime relationships. The third section considers the practical implications of drug-crime connections for the criminal justice system, offender assessment, and treatment programming. The fourth and final section examines the policy implications of the drug-crime relationship in the form of prevention, harm reduction, and society's response to drugs and drug-related crime. Students will enjoy the engaging writing style, instructors will welcome the logical manner in which the text is organized, and scholars will appreciate the comprehensiveness of coverage and the range of citations. Key Features: -Provides a step-by-step breakdown and synthesis of the drug-crime connection. - Organized logically so that a student first progresses through chapters that treat drugs and crime separately, gradually replaced by overlapping discussion of drugs and crime, up until the final section (policy) where the overlap is nearly complete. - Covers core topics, including the history of drugs and crime in America, theories of substance abuse, DSM-IV criteria for substance abuse, antisocial personality disorder, theories of crime, and neurotransmitters and drugs. Also includes discussions on important topics not commonly found in other texts including, meta-analysis, genetics of drug use and crime,

drug diversion programs, Prison-based treatment programs for drug offenders, evidence-based intervention, harm reduction, Portuguese and Dutch experiments, and much more. -Pedagogical features: Chapter opening learning objectives and chapter ending summary and critical thinking questions. *List of key words in each chapter.

Psychology For Nurses And The Caring Professions Walker, Jan 2012-05-01 "This beautifully written book ... clearly explains the application of psychological concepts and theories to health and succinctly summarises key issues. Each chapter also provides a series of vignettes capturing the kind of real-life situations health and social care professionals will encounter in their own practice and a set of thought-provoking exercises ... These will be invaluable in developing critical thinking skills and growing the capacity to provide the kind of empathic care which is the heart of person-centred practice" Dr Wendy Cousins, Course Director, University of Ulster School of Nursing, UK "I have recommended earlier editions of this book and now am delighted to say that this latest edition is even better. The authors continue to clearly explain the relevance of psychological theories, models and approaches to nursing care but now, through the use of frequent reflective activities, vignettes and a 'psychosoap' family, students are also highly encouraged to identify how the theory will help them to become the high quality holistic practitioners they desire to be." Anthony Duffy, Nurse Tutor, College of Human and Health Sciences, Swansea University, UK "This new edition embraces innovation in student learning. The use of the 'psychosoap' provides a structure which is meaningful and insightful. The chapter exercises have 'realworld' application and can be used to understand your own and others motivations, beliefs and values. Unlike many psychology texts ... this book offers real 'food for thought' and provides the building blocks which link theory to practice. It will also be a valuable resource for those who like to 'dip in' to a book." Philip Larkin, Professor of Clinical Nursing (Palliative Care), and Joint Chair, University College Dublin and Our Lady's Hospice & Care Services, Ireland "This new edition continues to improve the reader's experience, providing

comprehensive insight into the complex subject of psychology. It is user friendly, underpinned by research findings and will enable the reader to apply its concepts personally and professionally. It is a text which is well designed for student use and application and it has employed a number of innovative features ... An excellent resource, which I would highly recommend." Siobhan McCullough, Lecturer, School of Nursing and Midwifery, Queen's University Belfast, UK This bestselling book enables those working in health and social care to learn and apply sound psychological principles in the delivery of excellent, evidence-based, patient-centred care. The emphasis throughout is on the promotion and maintenance of personal well-being and quality of life - for care professionals and those they care for. The new edition features a more engaging and user-friendly format and has been comprehensively revised and updated to reflect the latest psychological knowledge. Psychological principles are also clearly set out and summarised in ways that are easy to read and understand. The fourth edition includes: A unique focus on transferable knowledge and skills applicable in a variety of situations Exercises integrated throughout the text to consolidate learning Examples presented in the form of 'psychosoap' characters drawn from the authors' experiences in research and practice An emphasis on positive psychology and promotion of resilience in the management of stress and negative emotions Reviews of recent advances in cognitive science and issues related to communication Psychology for Nurses and the Caring Professions is a succinct, readable and relevant introductory text ideal for students and practitioners in health or social care. Human Behavior and the Social Environment, Micro Level Katherine Van Wormer 2017-03-10 Human Behavior and the Social Environment, Micro Level draws on a resilience model to explore the dynamics of human behavior across the life span. Biological, psychological, and spiritual dimensions are covered. Illustrations and vignettes from social work, psychology,

literature, philosophy, and current events highlight the turning points in our lives. Critical thinking questions are provided. The result is an essential book that bridges theory and practice in accordance with the 2015 Council on Social Work Education (CSWE) standards.

The Psychological and Social Impact of Illness and Disability, Seventh Edition Irmo Marini, PhD, DSc, CRC, CLCP 2017-12-28
Praise for the Sixth Edition: "Adds an important international perspective on illness and disability. The personal narratives help bring the real world of people who are [survivors] to the forefront of the scientific discourse." —Doody's Medical Reviews
Now in its seventh edition, this bestselling classic continues to be the most comprehensive and diverse text available on the psychosocial aspects of illness and disability. It is substantially revised to reflect the growing disparity between the haves and the have-nots and incorporates social justice issues throughout the text. In addition to new and updated information integrated throughout the book, the seventh edition features two new chapters addressing social justice in regards to depression and disability, and the psychosocial aspects of grief, death, and dying. Additionally, the text now includes an Instructor's Manual and

PowerPoint slides. Combining a mix of seminal work from rehabilitation counseling legends with current theoretical and treatment approaches, the book provides a practical, real-life perspective and offers broad and inclusive coverage of the day-to-day challenges of working with a diverse and marginalized population. Additionally, the text analyzes barriers to enabling patients with disabilities and improving their quality of life. Chapter objectives, review questions, and personal narratives in each chapter facilitate in-depth learning. New to the Seventh Edition: Completely updated to incorporate social justice issues, from the medical and psychosocial aspects of combat trauma to the impact of mental and physical disabilities on immigrants, refugees and asylum-seekers, throughout Includes two new chapters addressing Social Justice/Depression and Disability and the Psychosocial Aspects of Grief, Death, and Dying Includes an Instructor's Manual and PowerPoint slides Enhanced coverage of topics concerning diverse and marginalized populations, including Women with Disabilities, Sexuality and Disabilities, LBGTQ Issues, Aging with Disabilities, Trauma, and more Key Features: Presents the most comprehensive and diverse coverage of psychosocial aspects of disability of any text Emphasizes the negative impact of societal attitudes and treatment of disabled individuals on their psychological adjustment to disability Examines both seminal and current thinking and treatment approaches Provides a bridge between theory and practice with abundant narratives Includes objectives and reviews questions in each chapter

Finding the Phoenix Karel James Bouse PhD 2022-05-18 A journal of self-discovery, *Finding the Phoenix*, by author Dr. Karel James Bouse introduces seven tools for transformative self-discovery, including how to deconstruct one's lenses, consciousness and identity; use expressive arts to access hidden elements of the self; connect with nature from a mystical perspective; find the meaning of your dreams; use Neo-shamanic

techniques for interdimensional self-exploration, demystify anomalous experiences and phenomena; and construct a personal mythology to discover your life purpose. Used synergistically, these tools facilitate a deep, personal investigation that bridges and integrates the conscious with the unconscious, and the mythic with the mundane. Bouse provides you with background information based in academic, scientific, and professional psychological research, and detailed exercises as you follow the fictional "Lucy" through a series of workshops designed to help you find the phoenix of your authentic self. Finding the Phoenix offers a combination of thoughtful instructions, rich personal narrative from the perspective of Lucy, and experiential exercises designed to evoke insight, creativity, and personal development.

Specialty Competencies in Clinical Child and Adolescent Psychology Alfred J. Finch, Jr. 2012-02-03 The specialty of clinical child and adolescent psychology has a history that dates back to the turn of the century when the first psychological clinic for children was reportedly established. As it is currently applied, this broad and wide-ranging specialty took organizational shape from the 1960s through the 1990s, and today child and adolescent psychology shares many characteristics and plays a collaborative role other specialties within professional psychology. These include clinical psychology, cognitive and behavioral psychology, school psychology, and clinical health psychology. In this volume, Dr. Finch and his co-authors provide a comprehensive demonstration of the competencies involved in this specialty, extending far beyond the scope of the age of its identified patient population. Offering an evidence-based best practices model of intervention informed by an integration of multiple professional competencies from a range of other specialty areas, this book is an invaluable resource for all those interested in pursuing the clinical child and adolescent specialty practice. Series in Specialty Competencies in Professional Psychology Series Editors Arthur M. Nezu and Christine Maguth

Nezu As the field of psychology continues to grow and new specialty areas emerge and achieve recognition, it has become increasingly important to define the standards of professional specialty practice. Developed and conceived in response to this need for practical guidelines, this series presents methods, strategies, and techniques for conducting day-to-day practice in any given psychology specialty. The topical volumes address best practices across the functional and foundational competencies that characterize the various psychology specialties, including clinical psychology, cognitive and behavioral psychology, school psychology, geropsychology, forensic psychology, clinical neuropsychology, couples and family psychology, and more. Functional competencies include common practice activities like assessment and intervention, while foundational competencies represent core knowledge areas such as ethical and legal issues, cultural diversity, and professional identification. In addition to describing these competencies, each volume provides a definition, description, and development timeline of a particular specialty, including its essential and characteristic pattern of activities, as well as its distinctive and unique features. Written by recognized experts in their respective fields, volumes are comprehensive, up-to-date, and accessible. These volumes offer invaluable guidance to not only practicing mental health professionals, but those training for specialty practice as well.

[Handbook of Autobiography / Autofiction](#) Martina Wagner-

Egelhaaf 2019-01-29 Autobiographical writings have been a major cultural genre from antiquity to the present time. General questions of the literary as, e.g., the relation between literature and reality, truth and fiction, the dependency of author, narrator, and figure, or issues of individual and cultural styles etc., can be studied preeminently in the autobiographical genre. Yet, the tradition of life-writing has, in the course of literary history, developed manifold types and forms. Especially in the globalized age, where the media and other technological / cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained, even enhanced, its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects, and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary studies, students as well as non-academic readers.

Aging and Age Discrimination in Europe Nesrin Oruç Ertürk 2022 The attitudes of societies towards ageism in an aging Europe have now become a social phenomenon. This study, which examines and deals with this phenomenon in various European countries, provides an opportunity to analyze the dimensions of ageism in different contexts. Based on these analyses, the exposure levels of older individuals to ageism in aging societies and the discriminatory attitudes of younger generations have been revealed. The book aims to make contributions to the field of ageism in European countries and contains a brief literature review on ageism and descriptive analyses in country context. As part of the project the project 'WISELIFE: Raising Awareness About Ageism' funded by EU ERASMUS+, this book investigates the concept of ageism in Turkey, Hungary, Poland and Italy. It is an essential resource for institutions working with older people, non-governmental organizations, academic circles dealing with age discrimination, and organizations such as the continuing education centers and lifelong learning centers providing education for older people to understand age discrimination and the situation of this concept in Europe.

Disability Across the Developmental Lifespan, Second Edition Julie Smart, PhD 2019-12-28 This is the only text to examine the experience of disability in relation to theories of human growth and development. It provides a foundational and comprehensive examination of disability that encompasses the intellectual, psychiatric, physical, and social arenas. The second edition is updated to underscore its versatility as an introductory text about the developmental tasks of people with disabilities for all the helping professions. Reorganized to illuminate the book's interdisciplinary focus, it includes new demographics, new case studies and first-person accounts, discussions on cultural aspects of disabilities, family concerns, and more. The text delivers practice guidelines for each of the conventional life stages and describes the developmental tasks of individuals with disabilities (IWDs). It emphasizes the positive trend in the perception of IWDs as normal and underscores the fact that IWDs have the

same motivations, emotions, and goals as those without disabilities. Learning activities, suggestions for writing exercises, and websites for further study reinforce learning, as do graphs and charts illustrating trends and demographics. NEW TO THE SECOND EDITION: Introductory chapter on understanding disability Demographic updates throughout New case studies and first-person accounts Expanded discussions about cultural considerations, intersectionality, and family considerations Updated Instructor's Manual and an Instructor's Test Bank KEY FEATURES: Examines the conventional stages of human growth and development from the perspective of individuals with disabilities Integrates disability concepts with developmental theories and stages of the lifespan Addresses common ethical issues to illuminate the real-world implications faced by individuals with disabilities and their families Includes learning activities, suggestions for writing exercises, and websites for further study Purchase includes digital access for use on most mobile devices or computers.

The Psychological and Social Impact of Illness and Disability, 6th Edition Mark A. Stebnicki, PhD, LCP, DCMHS, CRC, CCM
2012-02-24 "This edition...adds an important international perspective on illness and disability. The personal narratives help bring the real world of people who are suffering to the forefront of the scientific discourse."--Doody's Medical Reviews Now in its sixth edition, this best-selling textbook continues to be the most comprehensive and diverse text available on the psychosocial aspects of disability. It examines current thought and treatment approaches to working with individuals with disabilities through the contributions of expert thinkers and practitioners in the disability field. Abundant and insightful narratives by disabled individuals offer a bridge between theory and practice for students in rehabilitation psychology and counseling courses. In addition to completely updated and reorganized material, this edition contains insightful new section introductions, empirically

based research articles, and the contributions of international researchers presenting a more global and richer perspective on the psychosocial aspects of disability and illness. It also contains an increased focus on the negative impact of societal attitudes and treatment of disabled individuals on their psychological adjustment to disability. The addition of objectives at the beginning of each chapter and review questions and personal perspectives at the end of each chapter further facilitate in-depth learning. Key Features: Presents the most comprehensive and diverse coverage of psychosocial aspects of disability topics of any textbook available Examines contemporary thinking and treatment approaches in working with individuals with disabilities Provides a bridge between theory and practice through the narratives of individuals with disabilities Establishes a historical understanding of societal attitudes toward disability and treatment past and present of persons with disabilities Analyzes barriers to enabling persons with disabilities and improving social consciousness and quality of life for this population Facilitates course planning through inclusion of objectives and review questions/personal perspectives in each chapter

Death, Dying, and Bereavement in a Changing World Alan R. Kemp 2018-11-02 In this introductory text on thanatology, Alan Kemp continues to take on the central question of mortality: the centrality of death coupled with the denial of death in the human experience. Drawing from the work of Ernest Becker, *Death, Dying, and Bereavement in a Changing World* provides a multidisciplinary and multidimensional approach to the study of death, putting extra emphasis on the how death takes place in a rapidly changing world. This new, second edition includes the most up-to-date research, data, and figures related to death and dying. New research on the alternative death movement, natural disaster-related deaths, and cannabis as a form of treatment for life-threatening illnesses, and updated research on physician-assisted suicide, as well as on grief as it relates to the DSM-5

have been added.

Educational Psychology John Santrock 2008-12-11 John Santrock's *Educational Psychology* is a well-crafted text that emphasizes the application of theory to classroom practice. With richly evocative classroom vignettes provided by practicing teachers, as well as the most case studies - three per chapter - of any Introductory text, Santrock's *Educational Psychology* helps students think critically about the research basis for best practices. Additionally, Santrock's hallmark Learning System organizes the content into manageable chunks to support retention and mastery, and makes it much more likely that students will have an engaging and successful course experience. Child Development John W. Santrock 2021 "Child Development provides extensive learning connections throughout the chapters. This text has benefited from the involvement of one or more leading experts on diversity to ensure that it provides students with current, accurate, sensitive information related to diversity in children's development"--

Empowerment Series: Understanding Human Behavior and the Social Environment Charles Zastrow 2019-01-31 UNDERSTANDING HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT, 11th Edition, looks at the lifespan through the lens of social work theory and practice, covering human development and behavior theories within the context of individual, family, group, organizational, and community systems. Using a chronological lifespan approach, the book presents separate chapters on biological, psychological, and social impacts at the different lifespan stages with an emphasis on strengths and empowerment. Part of the Brooks/Cole Empowerment Series, this edition is up to date and thoroughly integrates the core competencies and recommended behaviors outlined in the current Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). or the product text may not be available in the ebook version. Voices from the Classroom: A Celebration of Learning Vana Chiou 2021 Voices from the Classroom illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching. The aim is to provide a rich and broad view of the impact of inquiry in the classrooms, from primary to higher education, and to provide a window into the perspective of teachers. Voices from the Classroom allows us to advance this mission by identifying and then turning educators' ideas into action. The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related, student characteristics and the experiences of refugees with bullying in the educational space. All the contributions published in this book emerged from real classrooms: our teachers and researchers conducted their research by drawing on their experience as educators. We believe that these insights into everyday classrooms, and the issues affecting them, are crucial to making teaching and learning better. We hope they can help drive real, positive change for students and teachers.
